ASTROLUME

Your Personalized AI-Powered Podcast

From personal questions to meaningful conversations.

Astrology-inspired personal reflection, powered by AI

Two virtual podcast hosts: Alex and Sam

Team: Murat Comez – Max Kempa – Sabrina Urriola

The Problem & Our Solution

The Problem

Traditional podcasts give every listener the same content.

Mainstream astrology websites provide generic reviews, not personalized.

Finding audio that answers a specific personal question is hard.

Our Solution: Astrolume

Turns personal questions into customized podcast conversations.

Grounded in a study of planetary positions, zodiac signs, houses, aspects, and planetary transits.

Explores transformation, control and personal growth.

How Astrolume Works

1

User Input

Python · Gradio

Personal question + birth information.

2

PDF Processing

PyMuPDF

Extracts reference material on the Natal Pluto Complex.

3

Script Generation

OpenAI

A personalized Alex & Sam dialogue, grounded in the PDF and your question.

4

Text-to-Speech

OpenAI + Pydub + FFmpeg

Two distinct voices, combined into a single MP3.

5

Gradio Interface

Gradio

Shows the script and plays the audio.

Note: personalization comes primarily from the user's question.

Python | Gradio | OpenAI API | PyMuPDF | Pydub | FFmpeg

Key Learnings & Next Steps

Key Learnings

- **Planning your project reduces mistakes**
- **Teamwork & Communication**
- **Testing is important**
- **Be adaptable**

Possible Next Steps

- Improve personalization and user customization.
- Enable adjustable podcast length for users.
- Enter the discussion of the podcast.
